

CLC's Video Games Course Description

Are you interested in card games or virtual walk in the woods? Let's explore the excitement of online and video games together. We'll look at simple online games like solitaire and crossword puzzles and move on to more complex video games.

In this class you will learn how to find, play and install the games you want with confidence. Here's what you'll learn:

1. **Understanding Game Reviews:** Discover how to decipher game reviews on YouTube and other platforms to find titles that pique your interest. Say goodbye to guesswork and hello to informed decisions!
2. **Hardware Requirements:** Before diving into a new game, it's crucial to know if your hardware can handle it. We'll guide you through understanding the hardware specifications of different games.
3. **Navigating Gaming Platforms:** Whether you prefer PC, console, or mobile gaming, we'll teach you how to navigate various platforms effortlessly. Learn how to launch games, save progress, and make the most of your gaming experience.
4. **Downloading and Installing Games:** Unsure how to download and install games on your device? We'll walk you through the process step by step, ensuring you're ready to dive into your favorite titles hassle-free.
5. **Optimizing Game Settings:** After installation, we'll show you how to optimize game settings for the best possible experience. Say goodbye to choppy graphics and lagging game play as you learn to fine-tune your settings like a pro.
